- ADJUSTABLE FEET FOR LEVELLING ON UNEVEN FLOORS

Offering totally flexible solutions in layout and design to optimise storage and hygienic awareness.

Manufactured from high strength extruded anodised aluminium to 20 microns, Fermostock is durable and abrasion resistant, making it suitable for all kitchen and cold room applications.

It's uncomplicated design eliminates the need for cross bracing, additional storage space and improved access is gained through the cleverly designed internal corner section.

Cross contamination and bacterial build up are easily controlled with the dishwasher safe inserts system. The anodised aluminium frame is also designed for maximum cleaning and hygiene.
